RE: 2023 Annual Report
Weststeyn Dairy
Glenn County, California

Dear Mr. Gamon and Mr. Walsh:

As required by Waste Discharge requirements Order No. R5-2009-0086, Weststeyn Dairy is to submit an annual report by January 15 each year containing the information on facility operations outlined in the Monitoring and Reporting Program and covering the period from November 1 through October 31 of the previous year. This submittal package includes the following:

- Updated Annual Dairy Facility Assessment Report (Exhibit 1)
- Annual Dairy Report (Exhibit 2)
- Map showing the location and number of acres of each field on the dairy and whether each field was or was not used for land application (Exhibit 3)
- Laboratory analytical reports from 2021 (Exhibit 4); no additional samples were obtained in 2023.

Groundwater monitoring reports and stormwater monitoring reports are submitted under separate cover to the Regional Board.

CHANGES TO OPERATIONS

The dairy ceased normal operations in late 2022. The majority of cattle were sold period since that time, the dairy has retained/milked fewer than 40 head of cattle. The operator hopes to operate as a boutique dairy and creamery going forward, with approximately 30 head of milking cows. This annual report reflects the reduction in cow numbers, and the reduction in amount of wastewater and manure applied. Wastewater was only applied to Field #10.

ANNUAL REPORTING

The annual report is required to be completed on an annual report form provided by the Executive Office and shall include all the information specified below:

1. Identification of the beginning and end dates of the annual reporting period; ***November 1, 2022, through October 31, 2023***
2. An Annual Dairy Facility Assessment using the tool provided by the Executive Officer or any future revisions; ***Included as Exhibit 1***
3. Number and type of animals, whether in open confinement or housed under roof; ***Included in the Annual Report (Exhibit 2) Available Nutrients Section: A. Herd Information***
4. Estimated amount of total manure (tons) and wastewater (gallons or acre-inches) generated by the facility during the annual reporting period and a calculation of the nitrogen, phosphorus, potassium, and total salt content of this waste: ***Annual Report Available Nutrients Section: B. Manure Generated and C. Process Wastewater Generated***
5. Estimated amount of total manure (tons) and wastewater (gallons or acre-inches) applied to each land application area during the reporting period and a calculation of the nitrogen, phosphorus, potassium, and total salt content of this waste; ***Annual Report Nutrient Budget Section: A. Land Applications***
6. Estimated amount of total manure (tons) and wastewater (gallons or acre-inches) transferred to another person by the facility during the annual reporting period and a calculation of the nitrogen, phosphorus, potassium, and total salt content of this waste; ***No manure or wastewater was transferred to another person by the facility during the reporting period***
7. A map showing the location and number of acres of each field on the dairy and whether each field was or was not used for land application of manure and/or wastewater during the annual reporting period; ***See Figure 1 (Exhibit 3)***
8. Summary of all discharges from the production area that occurred during the annual reporting period, including date, time, location, approximate volume, a map showing discharge, ultimate destination of discharge, and method of measuring discharge flows; ***No discharges from the production area occurred during the reporting period***
9. Summary of all stormwater discharges from the land application area during the annual reporting period, including the date, time, duration, location, a map showing the discharge and sample locations, ultimate destination of the discharge, and rationale for sample locations; ***No stormwater discharges from the land application area occurred during the reporting period***
10. Summary of all discharges other than stormwater from the land application area that have occurred during the annual reporting period, including the date, time, approximate volume, location, source of discharge (i.e. tailwater, wastewater, or blended wastewater), a map showing the discharge locations, ultimate destination of the discharge, and method of measuring discharge flows; ***No discharges from the land application area occurred during the reporting period***
11. A statement indicating if the Nutrient Management Plan (NMP) has been updated and whether the current version of the facility's NMP was developed or approved by a certified nutrient management planner as specified in Attachment C of the Order; ***The Nutrient***
