ADDITIONAL NOTES

A. NOTES

Field Grapes East Oats (1.41), Field Lower 80 Oats (1.41), Martin Field Oats (1.44) and Town Field Oats (1.60) all had high nitrogen field ratios as field failed to meet anticipated nitrogen removal of 160 pounds/acre. The subject fields removed 138, 138, 135 and 114 pounds of nitrogen respectively. All fields produced well below the 16 ton/acre anticipated yield level which ultimately led to the the high nitrogen field ratios. Nitrogen application to the subject fields in the form of solid manure was not considered excessive but in-line with that recommended in the dairy's nutrient management plan.
