RE: Full Coverage Bovine Annual Report 2022 Season
Mission Livestock Feedlot (General Order R5-2017-0058)
Orland, California

Dear Mr. Botsford:

The 2022 Annual Report for the Mission Livestock Feedlot in Glenn County, California, is attached as Appendix A. We apologize for the tardy submittal. The operator experienced personal difficulties beyond his control and was unable to furnish herd data in a timely manner. Regardless, the data has now been collected and compiled within for your review.

In addition, the required first semi-annual 2023 groundwater monitoring report has been completed. In addition to being submitted to GeoTracker, a copy of the report has been included alongside this annual report for your convenience in Appendix C.

There is no application of manure or wastewater to cropland as part of this operation. No wastewater is generated or applied from this operation. Stormwater that contacts livestock areas, such as exercise pens, is conveyed via pumps to the lined ponds onsite. Barns are scraped to remove manure. Manure is composted onsite and used for bedding.

GENERAL REQUIREMENTS

Beginning and End Dates of the Annual Reporting Period

Mission Livestock began receiving limited cattle numbers in November 2020. The 2022 Annual Report covers the period from January 2022 to December 2022.

Feedlot Numbers

A summary table of bovine numbers to date is given below.

Total Amount of Manure (tons) and Wastewater Generated

Manure generation is estimated on the form included in Appendix A. No wastewater was generated during this reporting period.

Bovine Numbers to Date			
Month	**Number of Cattle**	**Number of Cattle Under Roof**	**Number of Cattle Outside**
January 2022	951	0	951
February 2022	920	0	920
March 2022	928	0	928
April 2022	887	0	887
May 2022	2,109	0	2,109
June 2022	2,488	0	2,488
July 2022	2,414	0	2,414
August 2022	2,307	550	2,252
September 2022	3,865	550	3,315
October 2022	4,206	550	3,656
November 2022	3,952	550	3,402
December 2022	4,447	0	4,447
Total: 29,472 Average/Month: 2,456			

Total Amount of Manure (tons) and Wastewater Applied to Cropland
No manure or wastewater is applied to cropland.

Ratio Applied to Removed Nitrogen
No manure or wastewater is applied to cropland.

Total Amount of Manure (tons) and Wastewater Transferred to Others
No manure was transferred to others in 2022. No wastewater is generated at the facility.

Acres and Parcel Numbers used or not used for Application of Wastewater
No manure or wastewater is applied to cropland.

Summary of Manure and Wastewater Discharges
No manure or wastewater is applied to cropland.

Summary of Discharges from Land Application Areas to Surface Water
No manure or wastewater is applied to cropland. No discharges to surface waters occurred during the reporting period. All stormwater is retained onsite in lined ponds or stormwater detention basins.

Nutrient Management Plan
A nutrient management plan is not required for site operations.

Manure Manifests and Tracking
No manure was transported offsite during the 2022 reporting period.

Written Agreements
Agreements were provided in the initial reporting period per the General Order.
